

2008 Nationally Reported Registry Data

— National Average

— National Average

() indicates the number of transplant patients or grafts

*** Due to the small number of patients undergoing **Intestine** or **Simultaneous Heart and Lung Transplants**, these transplants were not graphed.

Disclaimer/Caution: The data used in the comparison graphs was obtained through a self-reporting process from the designated transplant centers for yearly volume and survival outcomes to the Scientific Registry of Transplant Recipients. The rates have been rounded to the nearest integer/These data comparisons cannot be used to draw final conclusions on transplant quality, care, or expertise provided by the designated transplant centers. It is recommended that members contact each program directly before selecting a particular center. See the document titled "Designated Transplant Centers" for the links to each transplant center in HealthPartners' designated network. *Counts for patient and graft survival are different because a patient may have more than one transplant for a type organ.*

**Blood and Marrow Transplant Center
2008 Patient Volumes*****

	Abbott Northwestern Hospital	Mayo Clinic	University of Minnesota Medical Center at Fairview & Amplatz Children's Hospital
Autologous Stem Cell and/or Bone Marrow	17	272	68
Allogeneic Donor (Matched & Mismatched; Related & Unrelated)	0	57	89
Cord Blood	0	0	93
Nonmyeloablative	0	9	101

***These rates combine both pediatric and adult transplantation.
