

Benefits for the long-term dental health of your children

Our goal at HealthPartners is to improve your dental health by offering the best coverage to you and your family. To get your kids started on the path to a lifetime of good oral health, we offer Little Partners Dental, which includes coverage for most services included in your dental plan for children 12 and under. Services performed by a network provider are covered at 100 percent, with no deductibles, no coinsurances and no annual maximum.

A lifetime of good health

HealthPartners recognizes that a lifetime of good oral health starts with our youngest members. That's why we offer the Little Partners Dental benefit, which ensures the long-term health of our youngest members by providing children with every opportunity to receive proper dental care. In addition to regular dental check-ups, it's important for your kids to get the right care at the right time.

- Dental caries, an infectious disease that causes cavities, is ranked as one of the most common chronic diseases affecting children in the United States.
- According to the American Dental Association, the earlier you schedule your child's first dental visit, the better the chance of preventing future dental problems.
- Estimates indicate that more than 51 million hours of school are lost each year by children due to dental-related illness.

Getting a jump start on good oral health protects against more advanced — and more costly — problems such as tooth loss, infection and damage to bones or nerves.
