

# Three visits — free!

Three for Free Plan  
\$500 / 75%

If you're looking for a health plan that gives you more for your money, look no further than HealthPartners Three for Free plan. You get a combined total of three free office, urgent or convenience care visits per year — and so do each of your family members. That keeps more money in your pocket!

## Key plan details

- We will cover the physician services on three office, urgent or convenience care visits per year — per family member. That's three free visits for each member of your family!
- Preventive care visits are covered at 100 percent and do not count toward your three free visits.
- You are responsible for your deductible and coinsurance on services for office procedures, laboratory, radiology, day treatment services, group visits, chiropractic care, physical, occupational and speech therapy.
- See your preferred network provider or network specialist — with no referrals necessary.

## How the Three for Free plan works

In addition to free preventive care visits, we will pay the physician fees for your first three office, urgent or convenience care visits! You only have to pay for additional medical expenses like office procedures, labs and X-rays. On these expenses, you have 75 percent coverage after reaching your \$500 deductible.

Here are some common examples.

Example	Cost of Care	Member Liability	What You Pay
Leslie went to the doctor and was diagnosed with a cold.	\$100 physician fee	\$0 (FREE visit)	\$0
Jack has had abdominal issues for a month and the doctor recommends blood work and a CT scan.	\$100 physician fee	\$0 (FREE visit)	\$475
	\$60 blood work	\$60	
	\$415 CT scan	\$415	
Mark's active lifestyle has worn down his knee. He elects to have damaged cartilage removed from his knee area.	\$4,000 surgery	\$500 (deductible) + \$875 (25% coinsurance)	\$1,375

*For illustration purposes only. Actual medical costs and coinsurance may vary.*

No matter where you live, work or travel, you're covered with high-quality network providers.
