

# Jane Brattain Breast Center

## Mammo a-go-go Community Outreach Program

Park Nicollet Jane Brattain Breast Center (JBBC) is designed by women, for women, with the latest technologies and experienced professionals dedicated to breast imaging and breast health with same-day screening mammograms and personal phone calls for all follow-up diagnostic care. JBBC provides screening mammograms at seven locations throughout the western metro area, including: Bloomington, Burnsville, Chanhassen, Maple Grove, St. Louis Park, Wayzata, and our two Mammo a-go-go mobile mammography trucks.

Donor and volunteer generosity sustain a variety of program enhancements and services to provide patients with education, comfort, and dignity via the Mammo a-go-go mobile events. This generosity also provides women in our local community, who don't qualify for other programs or support, with access to life-saving screening and diagnostic services.

Your generous support of the Women's Health Initiative means Park Nicollet Foundation can provide exceptional care and programming to support a woman's health throughout her entire life.

And for women lacking insurance or access to care, we can help remove the barriers, so that all women in our community can receive the quality health care they deserve.

“Thanks to your kindness, our Mammo a-go-go Community Outreach Program is partnering with community groups and nonprofits to provide no-fee mobile 3D screening mammograms, diagnostic services, breast health education, and interpreter services to women in need across our community.”

“Last year 1,351 women were screened through the program. With your help, we're detecting breast cancer at the earliest stages, when it's most treatable.”

— Jessica Lane, Mobile Mammogram Coordinator
