Core Procedure List — Rheumatology Clinical Privileges

To the applicant: Strike through those procedures you do not wish to request.

This list is a sampling of procedures included in the core. This is not intended to be all-encompassing but rather reflective of the categories/types of procedures included in the core.

1. Diagnostic aspiration and analysis by light and compensated polarized light microscopy of synovial fluid
2. Therapeutic injection of diarthrodial joints, bursae, tenosynovial structures, and enthesis
3. Use of nonsteroidal anti-inflammatory drugs, disease-modifying drugs, biologic response modifiers, glucocorticoids, cytotoxic drugs, antihyperuricemic drugs, and antibiotic therapy for septic joints
4. Performance or interpretation of:
   ✓ Biopsies of tissues relevant to the diagnosis of rheumatic disease
   ✓ Bone and joint imaging techniques
   ✓ History and physical examination
ACKNOWLEDGEMENT OF PRACTITIONER

I have requested only those privileges for which – by education training, current experience and demonstrated performance – I am qualified to perform and that I wish to exercise at Regions Hospital. I understand that:

1. In exercising any clinical privilege granted, I am governed by Regions Hospital and Regions Medical Staff policies and rules applicable generally and any applicable to the particular situation.
2. In an emergent situation I may perform a procedure for which I am not privileged when no practitioner holding the applicable procedure is available to respond to the emergency.

I agree to supply Regions Hospital Medical Staff Services (or designee) with all the information that has been requested of me for the privileges that I have applied for. I also understand that my application for privileges will not proceed until the information is received.
