

CURRICULUM VITAE

Name: Karen Margolis, M.D., M.P.H.

Office Address: HealthPartners Institute
8170 33rd Ave. S.
Mailstop 23301A
PO Box 1524
Minneapolis, MN, 55440-1524
Tel: (952) 967-7301
Email: Karen.L.Margolis@HealthPartners.com

Education:

1975 – 1976	State University of New York at Buffalo
1976 – 1979	University of Michigan (B.S. in Biology, 1979)
1979 – 1983	University of Michigan Medical School (M.D., 1983)
1990 – 1992	University of Minnesota (M.P.H. in Epidemiology, 1992)

Postgraduate Training:

1983 – 1986	Resident in Internal Medicine Department of Medicine University of Minnesota Medical School Minneapolis, MN
1986 – 1988	Fellow in General Internal Medicine Department of Medicine University of Minnesota Minneapolis, MN

Licensure and Certification:

1984 – Present	Licensure, State of Minnesota, #028761
1986	Diplomate, American Board of Internal Medicine

Awards and Honors:

1979	Recipient of National Science Foundation Graduate Fellowship
1979	Phi Beta Kappa, University of Michigan
1983	Alpha Omega Alpha, University of Michigan Medical School
1987	Associates Award, American College of Physicians, Minnesota Chapter
1990	Recipient of American Cancer Society Cancer Control Career Development Award
1995	Elected to fellowship in the American College of Physicians
1999	Recipient of National Institutes of Health Mentored Patient-Oriented Research Career Development Award (K23)

Membership in Professional Societies:

1984-Present	American College of Physicians
--------------	--------------------------------

1986-Present Society of General Internal Medicine
1999-Present American Heart Association
2011-Present American Society of Hypertension

Peer Review Activities:

Special Review Panel Pharmacogenetics Ancillary Studies, 5/2003

Editorial Board *Archives of Internal Medicine* 2007-2013

NIH Reviewer NHLBI Clinical Trials Review Committee, Standing member, 2008-2012

OSMB, Chair Nulliparous Pregnancy Outcomes Study Monitoring Mothers-to-be (NuMom2b) Heart Health Study, 2014-present

DSMB, Chair Hypertension Disparities Reduction Program Partnership, 2016-present

Academic Appointments:

1988-2001 Assistant Professor of Medicine
University of Minnesota Medical School
Minneapolis, MN

2003-2004 Guest Researcher
Department of Medical Epidemiology and Biostatistics
Karolinska Institutet
Stockholm, Sweden

2002-2009 Associate Professor of Medicine
University of Minnesota Medical School
Minneapolis, MN

2009-Present Professor of Medicine
University of Minnesota Medical School
Minneapolis, MN

2002-Present Adjunct Associate Professor to Adjunct Professor
Division of Epidemiology and Community Health
School of Public Health
University of Minnesota
Minneapolis, MN

Academic Administrative Appointments

1997 – 2001 Associate Investigator
Berman Center for Outcomes and Clinical Research
Minneapolis Medical Research Foundation, Minneapolis, MN

2001 – 2005	Associate Director Berman Center for Outcomes and Clinical Research Minneapolis Medical Research Foundation, Minneapolis, MN
2005–Present	Senior Clinical Investigator HealthPartners Institute, Minneapolis, MN
2011-Present	Director of Clinical Research, HealthPartners Institute, Minneapolis, MN
2015-Present	Senior Medical Director for Care Improvement Research HealthPartners Medical Group, Minneapolis, MN

Clinical Appointments:

1988-1997	Staff Physician, Department of Medicine Division of General Medicine Hennepin County Medical Center Minneapolis, MN
1997-2005	Staff Physician, Department of Medicine Division of Clinical Epidemiology Hennepin County Medical Center Minneapolis, MN
2005-Present	Staff Physician, Department of Internal Medicine, HealthPartners Medical Group Minneapolis, MN

Research Committee Assignments:

1998-2002	Vice Chair Publications and Ancillary Studies Subcommittee Antihypertensive and Lipid-Lowering Treatment to Prevent Heart Attack Trial (ALLHAT)
2000-Present	Chair Lifestyle and Background Therapy Working Group Action to Control Cardiovascular Risk in Diabetes (ACCORD) Trial
2000-Present	Member (and current chair) Outcomes Adjudication Committee and Central Cardiovascular Adjudicator Women's Health Initiative (WHI)
2003-2007	Member Ancillary Studies Committee, WHI
2007-Present	Member Steering Committee, WHI
2010-Present	Member International Steering Committee, Aspirin in Reducing Events in the Elderly (ASPREE) Trial
2013-Present	Member

Safety and Outcomes Subcommittee, Vitamin D to Prevent Type 2
Diabetes (D2d) Trial

Major Research Interests:

Hypertension epidemiology, treatment and prevention
Cardiovascular disease epidemiology and prevention
Diabetes epidemiology, treatment and prevention
Women's health

Current Research Support:

U01HL130163 02/01/2017-01/31/2021 Brigham and Women's Hospital
Influenza Vaccine to Effectively Stop Cardio Thoracic Events and Decompensated Heart Failure (INVESTED)

Influenza infection is known to be associated with increased risk of cardiovascular events, and leads to significant morbidity and mortality each year. Annual influenza vaccination is recommended by the Centers for Disease Control and Prevention, but the optimal vaccine regimen that portends the most protection in patients with high risk cardiovascular disease is unclear. The INVESTED study is a multi-center, randomized, active- control clinical trial of high dose influenza vaccine compared to standard dose influenza vaccine for three seasons in adult individuals with a history of myocardial infarction or heart failure who are at high risk for cardiovascular events. The results of this trial have the potential to inform health care policy regarding optimal influenza vaccination for individuals with high risk cardiovascular disease, which may in turn reduce morbidity from this annual threat to health stability in patients with cardiovascular conditions.

Role: Site PI

IHS-1507-31146 01/01/2016-05/31/2021 PCORI
Pragmatic Trial Comparing Telehealth Care and Clinic-based Care for Uncontrolled High Blood Pressure (Hyperlink-3) (Margolis)

This pragmatic trial is will be implemented in 20 HealthPartners clinics with little to no support from the grant (to show that it is feasible for health systems to implement and sustain). Clinic staff will recruit patients. Clinicians will need to be trained on the study protocols. The telehealth intervention will be supported by HealthPartners MTM pharmacists and nurse practitioners who will provide support over the phone.

Role: PI

2R01HL090965 08/01/2013-04/30/2018 NHLBI
Home Blood Pressure Telemonitoring and Case Management to Control Hypertension (Margolis)

The purpose of this proposal is to extend follow-up of the 450 patients enrolled in the HyperLink intervention and usual care groups to achieve three specific aims: (a) provide new data on the long-term durability (b) assess the cost-effectiveness of the Hyperlink intervention, and (c) use mixed methods to identify critical factors for delivering the intervention successfully and translating it into practice.

Role: PI

CER-1511-32979 11/01/2016 – 10/31/2019 PCORI

Blood Pressure Checks and Hypertension Diagnosis and Control (BP-CHECK) (Green)

Almost 1 in 3 Americans have hypertension—sustained high blood pressure (BP). Hypertension is the leading risk factor for cardiovascular disease (CVD), the most common cause of avoidable death and disability in the U.S. Our primary outcome is differences in mean systolic and diastolic BP comparing clinic, home, and kiosk to 24-hour BP and to examine the knowledge, preferences, and beliefs of providers (physicians, nurses, and MAs), managers, and organizational leaders about BP diagnostic tests pre and post study; to identify implementation barriers and facilitators for clinic, home, kiosk, and 24-hour BP monitoring. We hope to develop a better understanding of the effects of treatment options for severe postpartum hemorrhage and subsequent complications.

Role: Co-Investigator

CDRN-1306-04681

PCORI

Kaiser Permanente & Strategic Partners Patient Outcomes Research To Advance Learning (PORTAL)(McGlynn)

This study seeks to improve the ability and capacity to conduct widespread comparative effectiveness research (CER) through the creation of a national electronic data infrastructure. In Phase I of this initiative, the PORTAL Network developed a secure data infrastructure to maintain patient information and track them over time. Further, it engaged patients, clinicians, and other stakeholders in the research process. Phase II goals of PORTAL and PCORnet for health system engagement includes the use of the Common Data Model, supporting embedded clinical trials, and building sustainable collaborations. This will undoubtedly improve both observational and experimental CER and develop much-needed resources that can be used for both research and operations.

Depression RCT in ACS patients: Quality of Life and Cost Outcomes (Davidson)

Patients with an acute coronary syndrome (ACS) and comorbid depression have a 2-fold higher risk for recurrent ACS and mortality, worse quality of life, and higher costs of care than nondepressed ACS patients. Our specific aim is to determine the quality-adjusted life year benefits and health care costs of following the AHA's advisory for depression screening and then referral for further diagnosis and treatment in post-ACS patients, if depression is found.

Role: Site PI

Treatment of Hypertension In Adults with ThiazIDES: Pragmatic Trial Pilot Study (Margolis)

Despite the empirical evidence favoring chlorthalidone, hydrochlorothiazide is much more widely used in clinical practice. The results of this project are intended to inform development of a larger pragmatic randomized trial comparing the effectiveness of HCTZ and CTD for preventing cardiovascular events and mortality.

Role: PI

Prioritized Clinical Decision Support to Reduce Cardiovascular Risk (O'Connor)

The objective of this project is to develop and implement sophisticated point-of-care EHR-based clinical decision support that (a) identifies and (b) prioritizes all available evidence-based treatment options to reduce a given patient's cardiovascular risk (CVR). This decision support tool could be broadly used to both standardize and personalize care delivered by case managers, pharmacists, and other providers in a wide range of care delivery configurations.

Role: Co-Investigator

Diabetes, Metformin and Breast Cancer Prognosis (Luo)

The goal of the proposed study is to examine the causes for higher mortality in breast cancer patients with diabetes compared with non-diabetic breast cancer patients, particularly, to examine the impact of diabetes pharmacologic treatment on prognosis in breast cancer patients. The study will take advantage of the relatively new linkage of the Women's Health Initiative (WHI), a large prospective cohort study in the US.

ACCORDION: ACCORD Follow-up Study (Grimm)

ACCORDION is a prospective, observational follow-up study of approximately 8,000 participants who were treated and followed in the Action to Control Cardiovascular Risk in Diabetes (ACCORD) Trial. It is designed to further elucidate and clarify the long-term effects of

the ACCORD treatment strategies and provide additional data on the long-term relationships among various cardiovascular and diabetic risk factors.
