Scholarship Interests:

Utilization of case based and active learning methods to develop critical thinking skills

Assessing student performance as a method to improve the effectiveness of educational programs

Integrating didactic, experiential and extra-curricular educational platforms

Clinical pharmacy service expansion

Clinical cardiology pharmacotherapy

Publications: Listed at PubMed

Teaching Philosophy: I am committed to helping learners develop problem-solving strategies and critical thinking skills necessary to function effectively in the modern health care environment. Instruction focuses on understanding pharmacodynamic principles as a basis for drug therapy knowledge, as well as the ability to interpret data, react to drug therapy problems and initiate change when appropriate.
