

HealthPartners Advance Practice Clinician (APC) Longitudinal Experience

What is the APC Longitudinal Experience?

Students train at dedicated centers where preceptors have the passion, skills, and time to teach among interprofessional teams enacting best practices. Fewer students over a longitudinal period (9-12 months) immerses them into the culture of HealthPartners, facilitates recruitment and streamlines administrative support.

Our Mission

At HealthPartners, we're committed to establishing a best in class learning environment that provides shared value to our learners, our patients, our organization, and the communities we serve. To enhance and streamline student clinical rotations for nurse practitioner and physician assistant students we are on a journey to design quality clinical experiences in partnership with select schools.

Current Experiences

- Acute Care Nurse Practitioner (9 months)
- Family Medicine Nurse Practitioner (11 months)
- Pediatric Nurse Practitioner (9 months)
- Physician Assistant (9 months)
