

Specialty Drug List

Specialty medicines are usually prescribed by doctors who treat chronic and complex disease. These medications usually require a higher degree of management, have a high price and are not generally stocked at retail pharmacies. See your Summary of Benefits and Coverage (SBC) to learn more about your specialty medication benefit. **Please note this information also applies to HealthPartners UnityPoint Health members.**

- Generic medicines are shown as lowercase italicized (e.g.; *ribavirin*)
- Brand medicines are shown as uppercase bold (e.g.; **REBETOL**)
