

The Park Nicollet
and HealthPartners®
AchieveSM network

Top care and low cost

HealthPartners is bringing you a new network. It lowers your cost and improves health outcomes for your employees. It also gives your employees great metro access with a top-notch member experience. It's called the Achieve network and it's powered by HealthPartners and Park Nicollet.

With the Achieve network:

You'll achieve:

- **Lower costs** keeping your costs in check, while knowing your employees are getting the best care. Save between four and nine percent when you switch to Achieve!*
- **Greater network options** finding the right fit is easy. Small group employers can pair the Achieve network and the Perform network together. Large group employers can pair the Achieve network with either the Perform or Open Access network. Or choose Achieve by itself.
- **More flexible plan pairing options** mixing and matching just got better. Pick any benefit and network options, as long as benefit plans are different.

Your employees will achieve:

- **Great access** to the best doctors and hospitals in the western and eastern metro—no referral needed! Plus with primary, specialty and metro-area hospitals to choose from – your employees are sure to find the best care possible.
- **National coverage** with the HealthPartners and Cigna HealthCare Alliance, a national coast-to-coast open access network with no specialty care referrals required.
- **More choices** with employee level choice. They get to choose the network that best works for them.
- **Online health management** with health care information 24/7 and coverage for virtuwel[®] services.

Achieving goals together

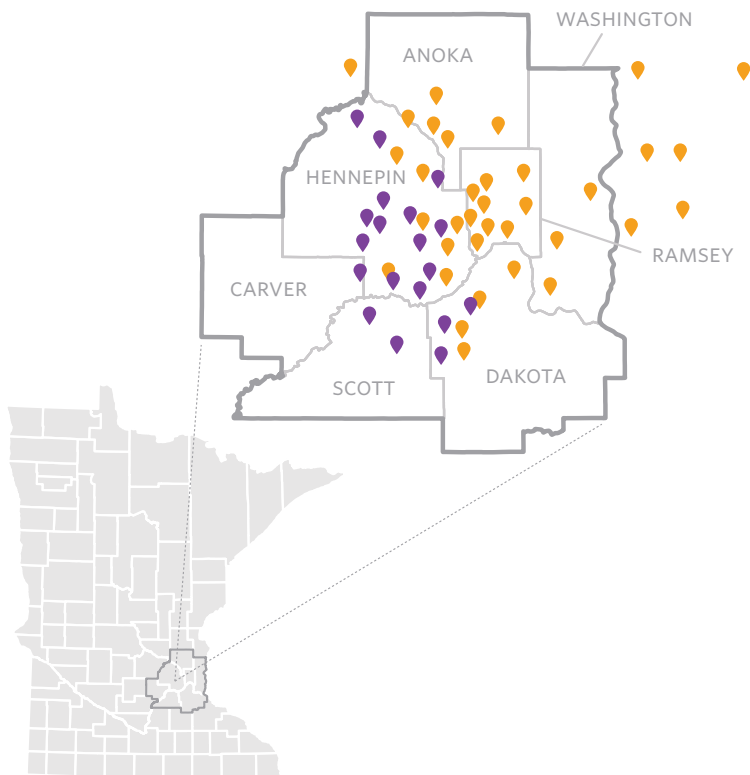

The Achieve network gives your employees great quality care without the spendy price tag.

*Small group employers can save up to nine percent when they switch from the Open Access network and save up to five percent from the Perform network. Large group employers are custom rated based on experience.

How do you know if the Achieve network is a good fit for your company?

This network is a good fit for companies who:

- Are headquartered in the Twin Cities metro area
- Have the majority of their employees living in the Twin Cities seven county metro area
- Want to save money without sacrificing quality care
