Distinctions - Low Deductible Plan

This is a traditional deductible plan with coinsurance. Your coinsurance percentage will vary based on your physician's or hospital's benefit level.

Plan Features

A limit on annual out-of-pocket expenses protects you from catastrophic claims. Each family member gets up to three discounted office visits. The plan pays the physician's fee each year for visits due to an illness or injury or mental health. Deductibles and coinsurance for lab, radiology and ancillary services still applies. For example, if you visit your clinic for a sore throat, the plan will not charge you for the physician's fees. However, the fees for the strep throat test still apply.

Empower - High Deductible Health Plan (HSA Eligible)

This is a deductible plan with coinsurance. Your coinsurance percentage will vary based on your physician's or hospital's benefit level. This high deductible health plan is designed to pair with a Health Savings Account (HSA). When you choose this plan and set up a HSA, you use HSA money to pay for eligible health care costs on a tax-free basis as long as those expenses are not reimbursed by another source. This plan has a deductible that you must meet before plan coverage takes effect. You may use money in your HSA to help pay for expenses falling under the deductible. Any money left in your HSA at the end of the year rolls over to the next year. If you leave the company, the account remains yours to use for future medical expenses. When you establish your HSA, you may choose from a number of financial institutions. However, if you set up your HSA with Wells Fargo, you may make pre-tax salary deferral contributions plus you will also be eligible for an employer contribution to your HSA of \$825 for single coverage and \$1,650 for family coverage.

Plan Features

A limit on annual out-of-pocket expenses protects you from catastrophic claims. You may use this plan with a Health Savings Account (HSA).
