Welcome to the MSHO 2017 Model of Care Training

Minnesota Senior Health Options (MSHO) is a Fully Integrated Dual Eligible Special Needs Plan in which Medicaid and Medicare benefits and services are integrated into one benefit package.

- HealthPartners contracts with the Minnesota Department of Human Services (DHS) and Centers for Medicare and Medicaid Services (CMS) to administer the MSHO program.

The MSHO Model of Care describes the management, procedures, and operational systems that HealthPartners has in place to provide access to services, coordination of care and the structure needed to best provide services and care for the MSHO population.
What is the MSHO 2017 Model of Care Training?

Model of Care training is required for employed and contracted personnel who work with MSHO patients/product

Ensure staff and providers have knowledge of the MSHO population and the HealthPartners Model of Care.

CMS requires that Model of Care Training be completed annually.
What are the Aspects to the Model?

- Member
- Care Coordinator
- Health Risk Assessment
- Individualize Care Plan
- Interdisciplinary Care Team
- Measurable Goals and Outcomes
- Care Transitions
Who can be an MSHO member?

- Lives in the HealthPartners 12 County Service Area
- Eligible for Medical Assistance (Medicaid)
- Has both Medicare Parts A and B
- 65+ years of age

Eligible for MSHO
What does an MSHO Care Coordinator do?

Care Coordinator:
- Partners with members and/or their responsible party/caregiver to coordinate care.
- Every MSHO member is assigned to a Care Coordinator.

The Care Coordinator conducts a Health Risk Assessment (HRA):
- To identify health care and level of care needs.

Creates an Individualized Care Plan (ICP):
- To ensure the member’s healthcare needs and preferences are met.

Collaborates with the Interdisciplinary Care Team (ICT):
- Ensures information is shared across healthcare staff.
What is the Health Risk Assessment (HRA)?

<table>
<thead>
<tr>
<th>HRA’s are completed:</th>
<th>HRA assess needs in the areas of:</th>
<th>RESULTS</th>

<tr>
<td>• Within 30 days of enrollment</td>
<td>• physical/medical</td>
<td>• Individualize Treatment Plan</td>
</tr>
<tr>
<td>• Within 365 days of the previous assessment</td>
<td>• psychosocial</td>
<td>• Referrals (MTM, Behavioral Health, Disease Management, Palliative Care, etc)</td>
</tr>
<tr>
<td>• Any time the member has a change in condition, such as a change in functional abilities.</td>
<td>• cognitive</td>
<td>• Initiating services</td>
</tr>
<tr>
<td>• Completed either in person (preferably), telephonically, or by mail.</td>
<td>• functional</td>
<td></td>
</tr>
</tbody>
</table>
What does an Individualized Care Plan include?

- Additional supports and services
- Identifying the Interdisciplinary Care Team
- Developed from the results of the HRA
Who are included in the Interdisciplinary Care Team?

The Interdisciplinary Care Team is a group of caregivers, providers, and possibly family members who assist in the provision of care.

The team is composed of:

• Member and/or appropriate family/caregiver
• MSHO Care Coordinator
• Primary Care Provider
• Other providers appropriate to specific health needs (Specialists, Pharmacist, Dentist, etc.)
• Others as needed
How does the team work together?

The Care Coordinator works in partnership with the member and Interdisciplinary Care Team to develop, coordinate, and monitor the Individualized Care Plan on an ongoing basis. The Care Coordinator communicates the member’s progress toward health goals to the Interdisciplinary Care Team.

HealthPartners uses a variety of tools to ensure good communication among all Interdisciplinary Care Team members regarding a member’s health status. These include the electronic medical records when available, secure email, fax and other confidential correspondence that meet HIPAA requirements.
What is the MSHO Provider Network?

The MSHO program requires members to select a primary care clinician and then they can determine which health plan to enroll in based on who is in each plan’s network.

- MSHO is the only State Public Program that requires members to enroll with a primary care clinician in the preferred health plan’s network.

As MSHO is a fully integrated product, it offers a network that has all provider types covered by Medicare and Medicaid (primary care, behavioral health, specialty care, dental, elderly waiver, DME, transportation, PCA and other providers).

- This includes our HealthPartners and Park Nicollet Clinics, as well as other contracted providers.
What’s Happening Behind the Scenes?

There are many aspects of the Model of Care that occur behind the scenes.

The supporting structure of the Model of Care is composed of employed and contracted staff who perform administrative, clinical and oversight functions, such as:

- Enrollment processing and eligibility verification
- Adjudication of claims
- Member and provider customer service
- Management of contracts with a variety of providers
- Regulatory compliance
- Professional staff credentialing
- Development and evaluation of standards of care
- Data collection and analysis of program goals
How is the model measured?

CMS requires plans to identify and define measurable goals and health outcomes which include:

- Improving the health care needs of the member
- Measuring overall member health outcomes at the plan level
- Methods to assess and track the Model of Care impact on the members health outcomes
- Processes and procedures the plan will use to determine if health outcome goals are met
What are our Measurable Goals?

- Meet 100% of Required Access Standards
- Maintain Zero Premium
- Complete 95% of HRA’s within 90 days of initial enrollment
- Complete 95% of HRA’s within 365 days of previous HRA
- Complete post-discharge assessment for 98% of beneficiaries
- Improve medication management to reduce 30-day readmissions by 7%
- Improve Osteoporosis Management by 1%
- Improve Breast Cancer Screening by 5%
What is our performance on our Measurable Goals?

- Meet 100% of Required Access Standards
- Maintain Zero Premium
- Complete 95% of HRA’s within 90 days of initial enrollment
- Complete 95% of HRA’s within 365 days of previous HRA
- Complete post-discharge assessment for 98% of beneficiaries
- Improve medication management to reduce 30-day readmissions by 7%
- Improve Osteoporosis Management by 1%
- Improve Breast Cancer Screening by 5%
What is the Quality Performance Improvement Plan?

HealthPartners annually creates a quality performance improvement plan to ensure that appropriate services are being delivered.

Data are collected, analyzed, and evaluated to ensure overall performance of the improvement plan.

HealthPartners Quality Program is based on the Triple Aim to simultaneously improve:

- The Health of the MSHO population
- The affordability of health care
- The experience of the MSHO members
What’s next?

HealthPartners is developing a new MSHO Model of Care for 2018 through 2020.

Much of our model will remain the same, with a few updates and improvements.

Stay tuned!!!
Thank you for taking the time to learn more about MSHO and HealthPartners Model of Care.
