

# We're looking for passionate, caring Registered Nurses.

Bring your expertise and join our team-based system of care.

**Help bring health care reform to ambulatory care. Innovative changes are happening now!**

As a RN in our clinics, you have the opportunity to work in [over 50 specialties](#), from birth to end-of-life care. Our locations are conveniently located across the metro area.

## What does it feel like to be a Clinic RN at HealthPartners?

You'll impact care for our patients by being an important member of our care team. Our care teams are just that – a team. You'll feel supported by your colleagues and know that your skills are valued and trusted. Our team ensures our patients are safe and have high quality of care by using evidence-based nursing.

## What do RNs at HealthPartners do?

Our organization provides a wide variety of roles and responsibilities:

- Promoting patient wellness
- Managing acute and chronic conditions
- Clarifying patient needs that honor their culture, values and goals
- Serving as a patient advocate
- Performing procedures and care services
- Evaluating patient outcomes
- Employing educational strategies to enhance patient self-management skills and promote health and disease prevention
- Coordinating care through management of high risk individuals and populations
- Assisting with navigating the health care system

Our nurses use their clinical backgrounds, develop leadership skills and strengthen their already incredible critical thinking abilities to help patients and their families get the best possible care.

## Learn more and apply!

We strive to improve the health and well-being of our patients while supporting each other. A healthy work-life balance is built into our culture. Our employees know they are valued through our benefits package, which is stronger than almost any other organization in the market.

**We have locations and specialties across the Twin Cities.**
