

## Drug Formulary Update, January 2022 Commercial Programs

Updates to the HealthPartners Commercial Formularies (PreferredRx and GenericsAdvantageRx) are listed below.

Please see [www.healthpartners.com/formularies](http://www.healthpartners.com/formularies) for details. Updates are effective by January 1, 2022.

Updates include

Drug name	Current Status	New Status	Notes
Canagliflozin (Invokana)	F-QL	NF-PA-QL	Empagliflozin (Jardiance) remains on-formulary as the preferred alternative. This update also applies to canagliflozin/metformin (Invokamet and Invokamet XR).
Emtricitabine/ tenofovir (Descovy)	F	F-PA	Generic Truvada is preferred. Descovy is reserved for patients with: 1. decreased bone mineral density due to osteopenia or osteoporosis, OR 2. decreased renal function (defined as creatinine clearance <60 mL/ min, or documentation of a significant decline), OR 3. 65 years of age and older
Continuous glucose monitoring systems (Dexcom and Freestyle Libre)	COV-PA-QL	COV-ST-QL	Coverage criteria have been updated, including a step-therapy from insulin. If you've used insulin within the previous 6 months, these will be covered. These are also available for patients with type 2 diabetes and one of the following: 1. documented hypoglycemia, or 2. documentation of considerable variability in glucose levels or inability to reach A1c goals despite frequent medication dose adjustments for 2 of more glucose lowering agents; or 3. documentation of barriers to glucose testing with glucose test strips (such as visual impairment, cognitive issues, and care giver assisting with care)

Formulary Abbreviations: F = Formulary, NF = Non-Formulary, PA = Prior Authorization, ST = Step Therapy, NC = Not Covered, SP = Specialty Drug, QL = Quantity Limit. MED = covered as a medical claim. A current formulary status is not shown for new medications.

PRx = PreferredRx Drug Formulary, GA = GenericsAdvantageRx Drug Formulary.

Drug name	Current Status	New Status	Notes
True Metrix glucose test strips	COV-QL	NC-QL	Accu-Chek remains as the preferred alternative.
Interferon beta (Rebif)	F-SP-QL	F-SP-PA-QL	Reserved for patients with an inadequate response or a medical contraindication to Avonex AND Plegridy
Weight loss medications, Saxenda and Wegovy	NF-PA	NF-PA	PA update. Phentermine/ topiramate (Qsymia) and naltrexone/ bupropion (Contrave) are preferred.
Mometasone/ formoterol (Dulera)	F-PA	NF-PA	Preferred alternatives include budesonide/ formoterol (Symbicort generic).
Salmeterol (Serevent)	F	F-PA	Olodaterol (Striverdi) remains on-formulary as the preferred alternative.
Ustekinumab (Stelara)	MED-PA	F-PA-SP	Ustekinumab (Stelara) is being added to HealthPartners' self-administered drug list. Medications on the self-administered drug list are processed through the pharmacy benefit.
